## **Fluoridation Industrial Waste Disposal and your Third Eye ~ How Fluoride Poisons your Pineal Gland**

Geoff has a Bachelor of Science with Honors, a PhD in Chemistry with undergraduate Biochemistry, and is an Environmental Consultant specialising in toxic exposures. His areas of expertise include;- Environmental Analysis, Chromatography, Mass Spectrometry, Environmental Pollution, Materials, Synthesis, Building Materials, X-Ray Diffraction, Material Characterisation and Nanomaterials.

The Pineal Gland, discovered by the ancients, but only recognised for its biochemical function in the 1950's, receives signals from the eyes which regulate your sleep cycle and circadian rhythm. Its' primary function is to produce molecules, including Melatonin, that have numerous effects on the central nervous system and much wider effects including Cancer suppression. Fluoride causes continuous accumulation of crystals of doped Hydroxyapatite that disrupt the Pineal Gland with far reaching consequences.

The Evenings' Presentation will Focus on;

- *The Pineal Gland and its' Interconnections.*
- *Functions of the Pineal Gland.*
- *Fluoridation as Industrial Waste Disposal.*
- *Fluoride Effects on the Endocrine System including Melatonin.*
- *Current Research on the Pineal Gland.*
