

ASTRO Networks Victoria Inc.

is proud to present

Stephen Shanahan

to speak on

The Sciences of Wilhelm Reich

When Stephen was a young student studying at the Southern School of Natural Medicine he was introduced to the teachings of Wilhelm Reich. This indeed is quite remarkable in itself and led him to the very first Confest organised by Jim Cairns (Deputy Prime Minister to Gough Whitlam) and Juni Morosi. Whilst swimming in the Confest dam Stephen met Eva Reich. This meeting set him on his lifelong journey of research into the Reich Sciences. It was here that Eva decided to stay in Australia for a year and teach Stephen her father's work and even offered to send her father's entire library to him.

Stephen has also; had biological studies published in Germany, photographed temperature differences without apparent work being done, has conducted experiments at Melbourne Uni to change a specific laser frequency and participated in research with Professor Korotkov who is famous for his Life Force Kirlian Photography.

The Evenings' Presentation will Focus on;

- *Weather Experiments in WA with Stunning Results.*
- *Vacuum Tubes, Life Energy and Studies in Electrostatics.*
- *Negative Energy Accumulators.*
- *Mobile Multi Layered Faraday Cage (Reichian Accumulator) Known as the Tartus.*
- *The Plasmatic Centrifuge / Generator.*
- *Experiments using Radioactive Isotopes and Magnets in the Centrifuge that Show it can actually reduce the Radioactivity Counts of Radioactive Material.*

**Stephen will Share a Remarkable Journey of Discovery and Will Open our Eyes to all Kinds of New Possibilities. An Informative Evening, Not to be Missed!
See You There!!**

Monday, 9th of July 2012

7:45 p.m.

Members - \$5.00

Non Members - \$10.00

Balwyn Library, 336 Whitehorse Road, Balwyn

Tea/Coffee/Herbal Tea with Biscuits provided
